

Connect With Customers Using Text Messaging

Unlimited Texting

Increase Sales Using Text

Improve Customer Service

Web Based API Included

Integrate with Business Apps

Real-time Customer Interactions

Connect and communicate with your customers in real-time via our embedded business text messaging service. Designed to deliver the highest level in customer experience, our real-time text messaging service allows you to text enable any business phone number delivered by Accent. Dump the short codes and "text only" numbers and send your customers direct messages from the business numbers they know and recognize.

98%

Open Rate

98% of text messages are opened within two hours of delivery.

67

Texts Per Day

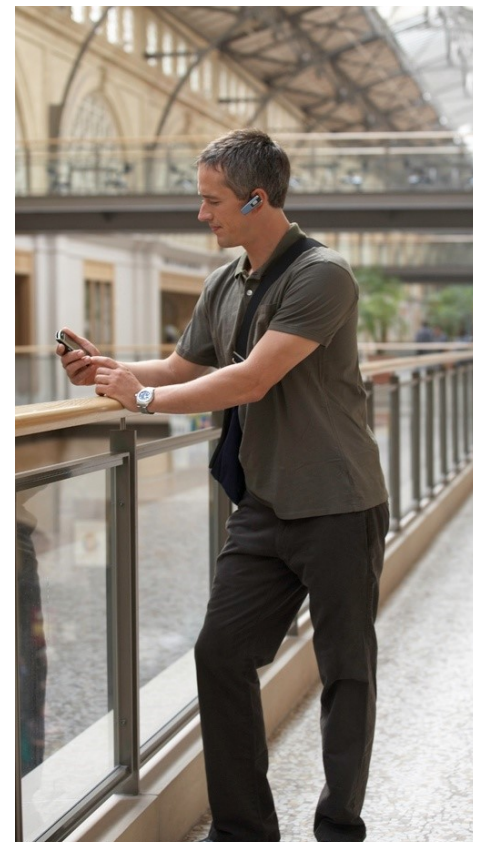

The average user 40 years and under exchanges 67 text messages per day.

Unlimited Text Messaging

Included with every phone number provided by Accent, unlimited text messaging allows you to communicate with customers and co-workers in new and exciting ways previously not possible. Don't worry about per message charges or monthly usage plans which are difficult to track and manage, with Accent it's all included as part of your monthly voice services.

Real-time API Integration

Integrate your business text messaging service with critical business applications to improve customer communication and increase productivity. Accent's business text messaging includes a complete web services based API which allows your business to layer real-time text messaging into your most important business applications and tools.
